When | Teaching week 5  
---|---
Goals | Practice with Scanner and printf.
1 Pre-workshop questions and activities

Before the workshop:

- Review the lecture notes up to section 11.
2 Workshop activities

2.1 Next lab walkthrough

The next lab has a design element. How to do it.
2.2 Programming practice

Do something that requires a Scanner and printf.
2.3 Anything else?

Any other questions about anything related to:

- this course;
- the degree(s); or
- the university?
